

Tutt Bryant Equipment WEAR PARTS

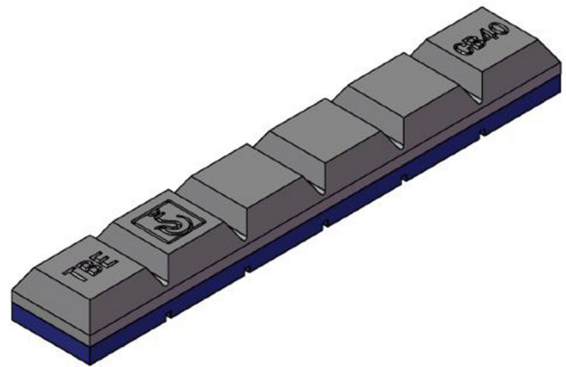

The unique, formable design of CHOCKBLOCKS and WEAR BUTTONS are available in various lengths, grades and sizes. Applications for these are wide and varied, ranging from specific wear protection on buckets for loaders, excavators and draglines machines, or for weld-on hammer tips for the re-cycling industry, or chute linings and rock box edges.

Easy to use and install

They can be bent, cut and formed to suit different surfaces at a price that doesn't hurt your back pocket!

CHOCKBLOCKS
